

Rob Warlick is a founding partner and managing director of SimpleVisit, a hosted telemedicine service delivering secure virtual visits. Rob's diverse background leading organizations in marketing and telecommunications space for over the past decade brings a unique insight in navigating the emerging industry of telemedicine. SimpleVisit enjoys national recognition for its patented video technology and innovative application in virtual visits.

John Kornak offers the benefits of his 20+ years guiding clinicians and administrators on innovative approaches for improving healthcare's delivery. His sage advice and expertise for telehealth and telemedicine is informed by his prior experience as Director of Telehealth at University of Maryland Medical Center where he implemented, managed, and supported over 20+ Telemedicine programs across the Medical System and throughout Maryland.

Dr. Kerry Palakanis is a Family Nurse Practitioner who has worked for over 25 years in rural health care in a variety of settings across the country. In 2012, she established the Crisfield Clinic, a private family practice, to provide care to the rural, underserved community of Crisfield, MD. She is a board member of the Maryland Rural Health Commission, a legislative committee member for the Maryland Rural Health Association and past president of the Nurse Practitioner Association of Maryland. Dr. Palakanis has served as a featured speaker at State and National programs on issues related to rural health care delivery and telemedicine.

Chris Knotts is a serial entrepreneur with a track record of innovation. Chris invented the system for text messaging interoperability used in the U.S. and licensed by Apple, Facebook, and others. Chris is also the Founder and Chairman of PEAKE Technology Partners, a Healthcare Managed Services Provider based in Crofton with clients throughout the MD/DC region. Prior to starting PEAKE and SimpleVisit, Chris served as the CTO of Force 3.
